This Topanga street listing is designed to make it easier to locate your Zone. It should be used in conjunction with the Zone maps on pages 85-94. If you live near the border of two adjacent Zones, be aware that evacuation orders in either Zone may affect you.

Zones are drawn following straight map gridlines. But Topanga roads are far from straight. Some roads cross over multiple Zones, which may be under different evacuation levels.

During an emergency when roadblocks and checkpoints are in force, you may be prevented from traveling through Zones which are under mandatory evacuation even if your "home Zone" is not under mandatory evacuation. Please understand that Zone evacuation orders are based on careful consideration of multiple factors, and are put in place for the safety of residents, firefighters, and other first responders.

Every neighborhood in Topanga has been assigned a FRS channel, which is listed in the third column in this table. If landline phones, cell phones, TV and Internet service are all down, you may be able to talk to your immediate neighbors by tuning your FRS radios to your assigned channel. See page 25 for more on FRS radios.
